Background:

College life is very important in every body's life because it not only determines the future of a Person but also is a time when most students understand the realities of life. But it has been observed that students do not enjoy their campus life till the end of freshman year. This is because of ragging. The above meaning was given by Supreme Court of India highlighting the seriousness of issue. Ragging which starts as fun for one group of students may have a far reaching influences on the other group of students, family and the Institution itself. The consequences may end up in death.
